

The US EPA (Environmental Protection Agency) has mandated that all water providers complete a Lead Service Line Inventory in order to identify any lead lines that may be present in privately owned homes or businesses. Since lead and copper primarily enter drinking water through plumbing materials, we are asking all City of Bridgeport water customers to complete the survey below in order to be in compliance with the EPA's Lead and Copper Rule.

| | | |
|---|----------------------|---|
| First Name | Last Name | Phone Number |
| Property Address | Email Address | Type of Occupancy <input type="checkbox"/> Owner <input type="checkbox"/> Renter / Tenant |
| Property Type <input type="checkbox"/> Single Family/Residential <input type="checkbox"/> Commercial <input type="checkbox"/> Multi-Family Residential <input type="checkbox"/> Industrial | | Year Built |
| Water Service Line Material at Entry Point - Based on the appearance, testing or existing records, please select the appropriate material of your water service line at the point of entry into your house (please select all that apply) – <input type="checkbox"/> Unknown <input type="checkbox"/> Lead <input type="checkbox"/> Copper <input type="checkbox"/> Plastic <input type="checkbox"/> Galvanized | | Interior Piping Material - Based on the appearance, testing or existing records, please select the appropriate material of your water piping inside your house (please select all that apply) – <input type="checkbox"/> Unknown <input type="checkbox"/> Lead <input type="checkbox"/> Copper <input type="checkbox"/> Plastic <input type="checkbox"/> Galvanized |
